

1 Cut the base of a paper cup.

3 Flatten the cup to double it...

5 Cut the outline of the swan.

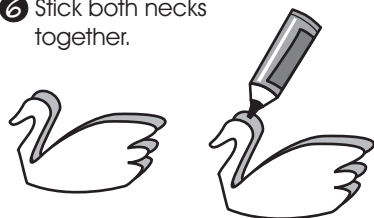

2 Also cut the rim of the cup.

4 ... and draw a swan on the cup.

6 Stick both necks together.

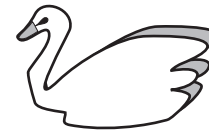

7 Cut a 2 cm notch near the base.

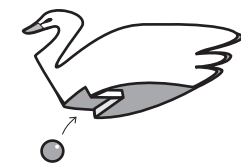

8 Reverse fold the cut portion to make a diamond shaped space.

9 Colour the beak and eye. Decorate the swan.

10 Place the marble in the diamond space...

11 ...and place the swan on a plate. Keep tilting the plate to make the swan glide round and round.

Because of low friction the marble will roll freely on the plate. The rolling marble will carry the light weight structure of the swan along with it.
