

1 Cut the plastic ball in two equal halves.

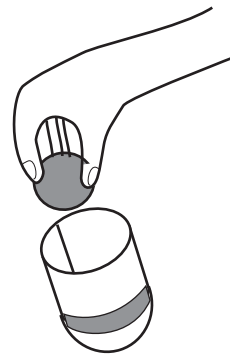

2 Fold the card strip in a hoop which should fit into the cut ball.

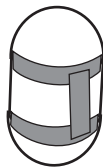

3 Tape the hoop and one half of the ball.

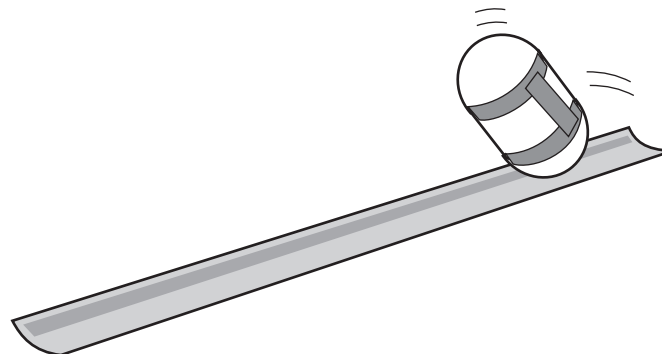

4 Drop a small crazy ball inside the hoop.

5 Now tape the second half of the ball to the hoop. This will complete the tumbler.

6 Place the tumbler on the V-shaped cardboard. Tilt it slightly to make it tumble down.

On tilting, the crazy ball shifts from right to left. This changes the centre of gravity of the capsule and it tumbles.
