

JUMPING FROG

This is an amazing paper toy. It needs a special size of rectangular paper where the length is double the width. The frog has a special spring folded from the paper itself. When you press the spring it makes the frog leap and jump.

 <p>1. Take a 10 cm x 20 cm rectangular sheet of paper. Fold two squares in it</p>	 <p>2. Fold criss-cross diagonals in both the squares. All the four creases should be in the same direction.</p>	 <p>3. Reverse the paper. It will look like two hillocks. Fold the edges of the hills to the midline.</p>	
 <p>4. Reverse the paper. Tap the centres of both squares to get two cups. Push to make a triangle.</p>	 <p>5. Repeat the same for the right side.</p>	 <p>6. Bring all the four standing triangular ears to the left and right hand side corners and crease.</p>	
 <p>7. Bisect the internal angles to make the legs jut out.</p>	 <p>8. The model when reversed looks like a tortoise. Crease its backbone.</p>	 <p>9. Crease the left and right hand edges of the diamond shape to the backbone.</p>	 <p>10. Fold the base triangle upwards, and insert the left flap in the pocket of the triangle to make a lock.</p>
 <p>11. Similarly, lock the right flap.</p>	 <p>12. Make a Z shaped spring by first folding the frog backwards and then forwards.</p>	 <p>13. Press the spring to make the frog jump and leap.</p>
