

BALLOON BLAST

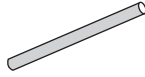

YOU NEED

Balloon

Thread

6-cm Straw

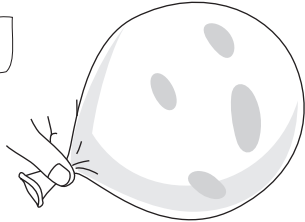

Cello tape

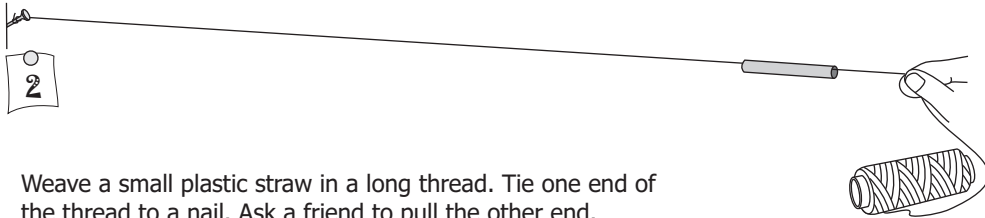

Scissors

1

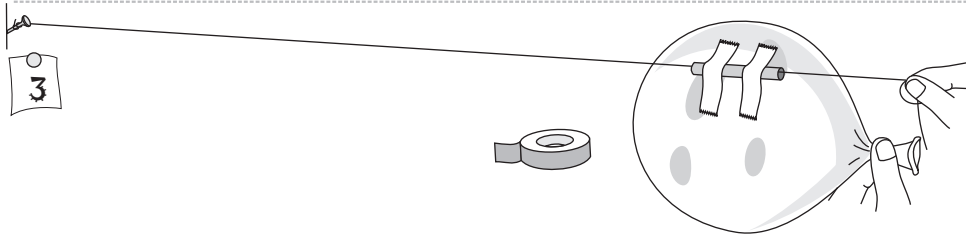

Inflate a balloon and close to its mouth with your hand.

2

Weave a small plastic straw in a long thread. Tie one end of the thread to a nail. Ask a friend to pull the other end.

3

Tape the balloon to the straw. Then release the balloon. Air will eject out of the mouth like a jet and will propel the balloon along the thread like a rocket.
