

### ANGLES OF A TRIANGLE

Tear the triangle into three parts and then bring the three angles together to make 180 degrees.  
Try this with different triangles.

### ANGLES OF A QUADRILATERAL

Take any four-sided quadrilateral. Tear it as shown into four parts. Then bring the four-corners of the quadrilateral together. They will snug into each other to add up to 360 degrees. Try this exercise with different shapes of quadrilaterals.
